SYNOPSIS:

Human Resource Management System will enable corporate companies to understand their characteristics and details regarding their work process. We are planning on creating a starightforward , user friendly product which will be easily accessible. Our product will facilitate recruitment and onboarding.

The proposed system provides detail general information about the employee along with Educational, Certification, Skill and Project details. It enhances the HR Management in adding, viewing and updating employees' details and generates various reports regarding employee's skill and experience.
